

FLORE LAFORGE

Front End Developer

Personal Goals

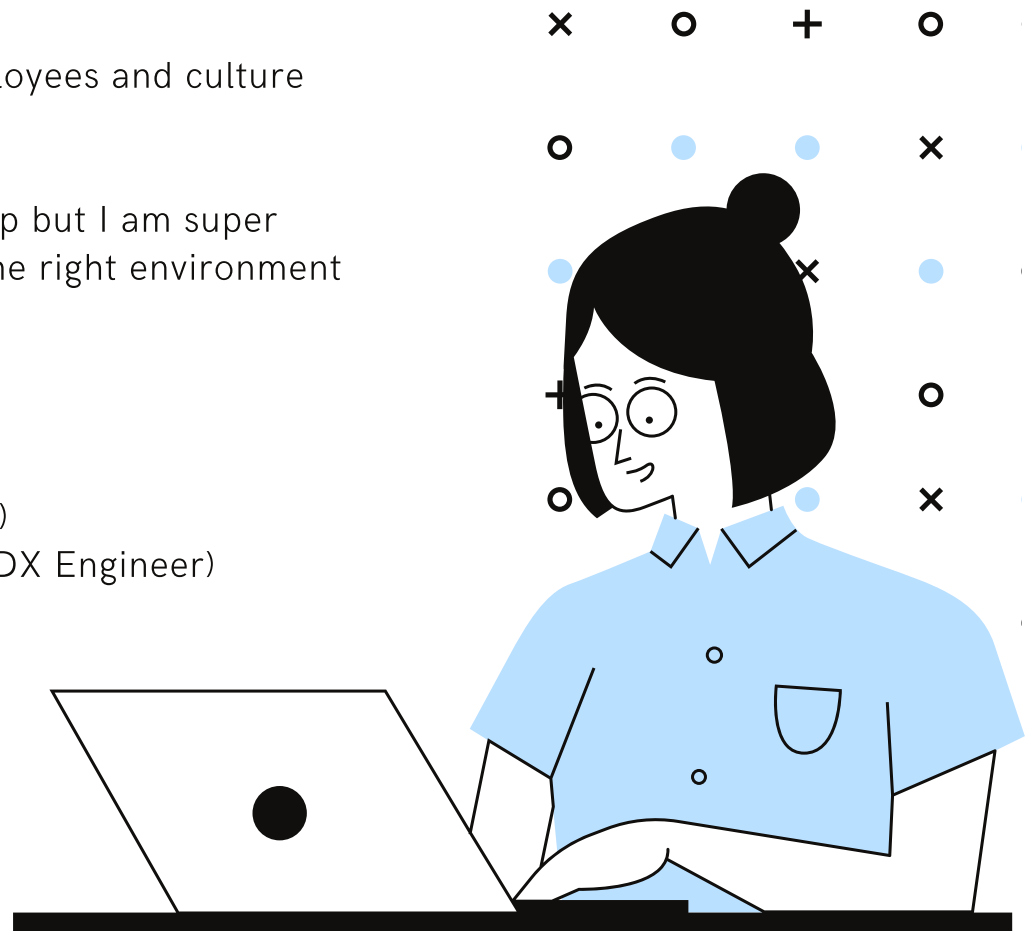

- Develop technical skills
- Live and breath code
- Develop writing skills
- Develop relationships with diverse areas of the business (CX, marketing, back-end engineering)
- Work with technology-minded people
- Be part of a company that values employees and culture
- Professional growth

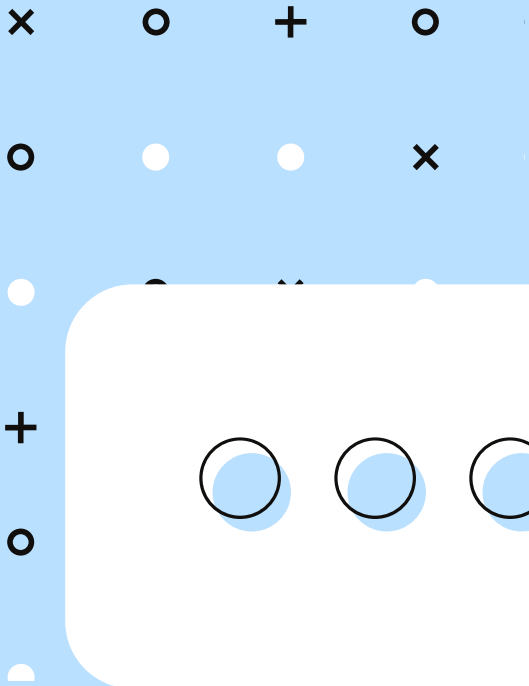

CATCH: I will need a bit of time to level up but I am super motivated, and I learn fast when I am in the right environment

My career roadmap

2yrs > Front end engineer (DX Engineer 2)

5yrs > Master front end engineer (Senior DX Engineer)

Why I choose to change job

My role has stalled at Westpac; I am now doing more solution design and architecture; I want to go back to code.

My experience at Westpac

Pros

- Business skills
- People skills
- Presentation skills
- Broad thinking, creative thinking, 'outside the box'
- Work closely with UX and CX designers

Cons

- Working isolated from tech people/dev teams
 - Quality of code and best practices
 - Being in innovation in a company like Westpac is challenging: nothing really gets through the door (or a version that is less than expected)
-

The extras

On top of my day-to-day responsibilities, I am:

- culture advocate
- organiser of team events
- creator of assemblies
- initiator of challenges
- member of dev communities

My hobbies
